AnyConnect

The *Smarter* Camera Platform

About AnyConnect

Version 1.0 | As seen on About AnyConnect

Company Profile

AnyConnect is a software platform for smart cameras that are aware of and react to their surroundings. The AnyConnect platform enables the design, development, and deployment of smart cameras at scale. AnyConnect customers such as AT&T, AVer, Philips, and Vidyo have deployed millions of smart cameras and video devices based on the AnyConnect platform.

AnyConnect was founded in 2016 by a team of designers and developers who share a passion for connected devices, smart things, and computer vision. AnyConnect is based in Singapore with offices in San Francisco, Macedonia, and Tokyo.
